What a travesty of justice!

Microsoft is caught red-handed using monopolistic strong-arm tactics to eliminate any competition and the DOJ let's them off without even a slap on the wrist. You people should be ashamed to walk the streets in daylight... Hell MS has admitted to dumping the Win2000 O/S into the marketplace with 63,000 KNOWN BUGS, i.e., software defects, as in "ONLY" 10,000 of these BUGS are known to cause system crashes and loss of data !

HELLLLLLLLLLLOOOOOOOOO is anybody home at the DOJ and FTC ???? Do you need a 2 x 4 along side your head to understand the cost to all consumers when you let MS use Mafia tactics to eliminate competition. Time to get a conscience and a grip on reality folks because the people you're pissin' off are the people who vote at election time. Know what that means???

Kind regards,

Randy Hubbard
